Dispute

##### Work description.

- Completed processing the Pier E2 Centerline and movement due to thermal expansion survey. Sent the results of the survey in an email to pertinent Caltrans personnel in Construction and Design.

- Met with ABF engineer Andre Markarian, and Caltrans engineers Paul Jefferson, Parviz Jalali, Bob Brignano, and Jason Wilcox regarding the Hinge A pipe beam alignment and shimming at 10:30am in the ABF office.

-Shadowed Victor Pereyra while inspecting the cable hand wrapping of S-wire operation. Since I was going to be responsible for the operation tomorrow the intent was to become familiar with the operation and follow up on the agreements and understandings that Victor has with the Contractor. See Victor's diary for more details and labor regarding this operation.

#### Attachment

Wedge placed in a cable band casting on the Sidespan.

Bulges of the S-wire due to crossed main cable wires on the downhill side of cable band 24N.
